CENTRAL INTELLIGENCE AGENCY

Attachment A

Telephone Switchboard, Type MB. in Cotton  
Gin No. 42 in Kokand

## Legend:

- 1 20 line lamps in two rows. These are numbered from 1 to 20, and are called in Russian blenker or klapan.
- 2 Jacks for 20 plugs in two rows. These jacks are called in Russian gnezda, i.e., nests. The line lamps and the jacks are called in Russian by one word, viz. shit.
- 3 Five pairs of plugs called in Russian ghtekker.
- 4 Five keys called in Russian klyuchi
- 5 A winding handle for calling, i.e., ringing, which in Russian is named induktor.
- 6 The receiver and transmitter which together are called trubka in Russian.
- 7 The cabinet holding three batteries which the Russians call leklangshe. Each battery has the strength of 1.5 volts and may be either wet or dry. Each battery contains a carbon rod, a small sack filled with powdered carbon, zinc, and sal ammoniac (nashatir) which in a dry battery is in the form of dough (sic) and in a wet battery is in solution.
- 8 A cable consisting of three or four wires of different colors, i.e., red, black, and green.
